

CCCC Workshop

„Perspectives in adoptive T cell therapy for cancer“

February 19, 2015, from 15:00 to 18:00

Venue: CCCC, Konferenzraum, level 3, Virchowweg 23 / Invalidenstraße 80,
Charité Campus Mitte

Organizers: *Antonio Pezzutto, Gerald Willimsky, Sebastian Ochsenreither*

- 15:00 **Adoptive T cell therapy for cancer in the clinic:
Past, present and perspective**
Antonio Pezzutto
- 15:10 **Adoptive T cell therapy from the clinician's point of view: trial
design and practical application**
Sebastian Ochsenreither
- 15:30 **A syngeneic mouse model to analyze therapeutic efficacy of
human T cell receptors and target antigens for adoptive T cell
therapy**
Matthias Leisegang
- 15:50 **Preclinical analysis to clinical translation: MAGE A1-specific T cell
therapy for multiple myeloma**
Gerald Willimsky / Antonio Pezzutto
- 16:10 coffee break
- 16:20 **Mart-1-specific T cell therapy for melanoma**
Serge Leyvraz
- 16.40 **Targeting somatic mutations in human cancer by T cell receptor
gene therapy**
Antonia Busse
- 17.00 **CAR T cell therapy for neuroblastoma**
Annette Künkele
- 17.20 **Final discussion**
Gerald Willimsky
